WORK EXPERIENCE

Full-Stack Developer, Neuroogle

Izmir, TUR • March 2020 — July 2020

- Worked on developing webpages by following waterfall methodology.
- Used React to improve rendering performance and NodeJS for server applications.
- Developed code to fetch data from the backend and populate the UI using AJAX and JSON.
- Used Bootstrap frontend framework for faster and easier web development.
- Implemented interactive web applications for sample display that utilized JavaScript and CSS
- Used JavaScript DOM manipulation nad JavaScript event to generate the data result in UI.
- Utilized MongoDB as a database to store data such as search results, account information, etc.
- Used jQuery extensively to implement the AJAX driven application used internally.
- Created User Guides for the installation and usage of Subversion Tortoise SVN.
- Designed Use Case Diagrams, Class Diagrams and Sequence Diagrams and Object Diagrams to model the details of the application using UML.
- Used GIT as a project version control tool for developers to commit and check code.

Freelancer, Freelance Projects

Remote • September 2018 — Present

- Working on React components, Forms, Events, Keys, Router, Animations and the Redux concept.
- Designing the frontend applications, user interactive UI web pages using web technologies like HTML5, CSS3, JavaScript, jQuery, JSON, AJAX and Bootstrap.
- Responsible for the database in MongoDB, PostgreSQL and MySQL to store and load data which comes as structured and unstructured data.
- Working with release management to execute daily code releases plus any additional branch maintenance using SVN.
- Creating architecture diagrams, component diagrams and logical-to-physical diagrams using MS Visio.
- Creating web scrapers using Cheerio
- Creating APIs using frameworks such as Express, Laravel, ASP.NET and Spring Boot.
